### **Risk Disclosure**

All investments involve risks, including the loss of principal. The past performance of a security or financial product does not guarantee future results or returns. Keep in mind that while diversification may help spread risk it does not assure a profit, or protect against loss. Customers should consider their investment objectives and risks carefully before investing in securities. The price of a given security may increase or decrease based on market conditions and customers may lose money, including their original investment. The product features described are meant for informational purposes only and are not intended to serve as a recommendation to a customer to buy, hold or sell any security or any other asset, or engage in any investment strategy involving securities.

Options trading entails significant risk and is not appropriate for all customers. Customers must read and understand the [Characteristics and Risks of Standardized Options](#) before engaging in any options trading strategies. Options transactions are often complex and may involve the potential of losing the entire investment in a relatively short period of time. Certain complex options strategies carry additional risk, including the potential for losses that may exceed the original investment amount.
